## Classroom education's charm can never fade

This pandemic has changed our lives totally. We need to take all the safety measures and follow the protocols. We are responsible for our own safety. Our mode of education has also changed. It has become diverse and flexible, now adapting and adjusting, according to the present scenario.

The advantages that online education brings to students are immense and indisputable. Students are taking classes from the safety, security, and comfort of their homes. It has given a rise to online platforms and people are making varied discoveries in this field with the help of advanced and upgraded technologies.

It is very convenient and fast. Sharing files, holding discussions was never so easy! They can acquire all the learning

On, the other hand, online classes turn into a curse as internet availability is one of the major concerns. There are sometimes network issues and technical glitches as well. As students are not physically present so there is a lack of interaction between students and teachers. There is a fall in integrity and morality in students. Social skills are also on the decline as students are not going out of their homes. There is an increase in screen time which causes a lot of other problems. And because of electronic devices students are becoming lazy and they are not bothered about anything which is happening around them. Excessive use of

## A gripping murder mystery

"And Then There Were None" is a gripping thriller, isn't it? Written by Agatha Christie known as "The Queen of Mystery". Now, after reading my first Agatha Christie novel I can surely understand why she

never truly getting the answers of all your questions by the end, which most

of the authors do but Agatha is an exception. This book is so well ended and answers every possible question in the reader's mind. The story is about ten complete strangers sent invitations they could not refuse to visit Soldier Island by Mr. Owen. Upon their arrival they find out that the host is delayed. They all try to find comfort on the small island before they get a tape stating the murders each of them had committed, although on the outer face they all denied to be a part of it but deep down they knew that it was the truth. Now people are getting murdered the same way as stated in a nursery rhyme but who is the murderer?

You need to read the book for getting the answer to this question.

## Children should not play PUBG

PlayerUnknown's Battleground is a multiplayer video game that is played by millions of people all around the world. It is considered to be an addictive game. The students who play this game waste their time and are prone to neglect their studies. It has also resulted in many crimes such as murders and suicides. One must set a definite time for children's gaming sessions. Students should not play PUBG and such other games as they are violent and addictive. Due to excessive gaming habits, children are getting distracted and do not concentrate on their studies. Playing this game all the time is causing students to suffer from various health problems, as well. It is mainly due to the excess screen time that their vision is impaired, along with harm being caused to other body parts.

## WOMAN!!!

Few lines dedicated to women! Love, devotion, dedication, humility and sacrifice personified

She is a complete chaos of overwhelming emotions So very soft, meek and timid yet incredibly strong Her dreams are not her own, does not

even own her life She lives for others, lends them her happiness and embraces their tears She weaves dreams of others in her eyes And gives them wings also to fly She's an intricate artwork of wonder and awe! Nothing on the earth would suffice All that she is and all that she stands for!!
